CONDITIONS OF SALE

- Orders will be shipped credit card only.
- All orders shipped F.O.B Broken Arrow, OK.
- Freight will be added to your order.
- Damaged merchandise must be reported within 5 days of receipt of package. We will inform you of what action to follow.
- Candles will not ship if temperatures exceed 90 degrees.
- Unable to ship to P.O. Box, please provide physical address.

- GENERAL CANDLE CARE**
- Prior to lighting remove and discard all packaging.
 - For a more even burn keep wick centered and trimmed to 1/4" at all times.
 - If smoking occurs, extinguish flame, trim wick to 1/4" and remove any extra trimmings before relighting.
 - Keep candles free of wick trimmings and other debris.
 - Never leave a burning candle unattended and always keep out of reach of children and pets!
 - Do not place candles near other heat sources or directly on furniture and keep any burning candle away from anything flammable.
 - Always burn your candles in a draft free area.
 - Be sure to place any candle in an appropriate holder before lighting and never place holders or candles on any unprotected surface as heat or wax may cause damage.
 - Do not burn the last 1/4" of your candle. The container could become too hot and break.
 - We suggest using our Smokeless Candle Snuffer to extinguish your candle as wax may splatter.
 - Votives are made to liquefy. Burn them only in appropriate holders. Never burn votives freestanding.
 - Only burn a pillar candle on its appropriate holder and make sure it is straight and set firmly on its holder.
 - As the pillar burns be sure you adjust the wick away from the pillars edge or towards the high side of the pillar. This will help your pillar to burn evenly.
 - Your pillar will perform at its best if you will let your pillar burn until its wax pool reaches the candles edge.
 - Avoid placing any pillar in a drafty area or any area with excessive vibrations or heat sources to prevent dripping.
 - Discontinue use when 1/2" of wax remains.
